Mark A. Hallen, Jianghai Ho, Christine D. Yankel, and Sharyn A. Endow. 2008. Fluorescence recovery kinetic analysis of  $\gamma$ -tubulin binding to the mitotic spindle. *Biophys. J.* 95:3048–3058.

Equation 3 should read:  $F_{\max} e^{-k_e \left(\frac{t^2}{\tau_o^2}\right)}$ .

Equation 14 should read:

$$\frac{\partial \text{frap}(t, D, k_{\text{on}}^*, k_{\text{off}})}{\partial k_{\text{on}}^*} = \frac{NF_{\text{eq}}(1 - e^{-k_{\text{off}} t} - S(t, D))}{k_{\text{on}}^* + k_{\text{off}}}.$$
